DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record, Manikutty et al. (US Patent 7,120,645 B2) and Shanmugasundaram et al. ("Relational Databases for Querying XML Documents: Limitations and Opportunities", Published Sept. 1999 in "Proceedings of the Twenty-Fifth International Conference on Very Large Data Bases", Pages 302-314) teach analogous art to the instant application, that of processing queries applied to an XML database. Manikutty more specifically teaches a method of rewriting XML queries by transforming the XML query into one or more relational database constructs for optimization and enhanced performance. Shanmugasundaram more specifically teaches translating queries over XML databases to SQL queries over tables, and converting the results to XML. However, after careful consideration of the remarks (pages 9-12) filed 12/31/2008, the applicant extensively and specifically pointed out how the claim amendments overcome the prior art of record, particularly Manikutty's method of rewriting XML queries into relational database constructs by utilizing a mapping between one or more SQL operations and XML operations, which is different from the instant application's method of translating XML queries by utilizing a semantic intermediate language representation with a rooted graph structure to translate the queries for heterogeneous data sources. Thus, in the instant application, queries are translated to a semantic intermediate language

representation with a rooted graph structure to be processed by query engines to represent queries over difference relational and non-relational data sources.

This feature is indicated in independent claims 1, 11, 17, and 21, wherein a plurality of nodes of a rooted graph structure is defined which represents the at least one XML language inquiry, translating each of the node objects using an intermediate language operator to generate a semantic intermediate language representation, and partitioning the XML language inquiry by distributing one or more portions of the semantic intermediate language representation to corresponding query engines based upon a data source. Consequently, independent claims 1, 11, 17, and 21 and dependent claims 3-6, 8-10, 12-15, 18-20, and 22-23as amended are allowable over prior art.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
